

AI-Powered Product Office Transformation

Role: Product & Service Improvement Specialist

Company: Vodafone Group

Challenge

Product Managers spent significant time preparing documentation, business cases, and strategic product materials. The Product Office sought opportunities to improve efficiency through Generative AI.

My Role

I participated in the implementation and adoption of an internal Generative AI solution supporting Product Managers and strategic planning teams.

Actions Taken

- Evaluated AI use cases across Product Management workflows
 - Identified opportunities for automation and productivity gains
 - Helped define AI capabilities for Product Canvases
 - Worked with Product, Strategy, Commercial, and Finance stakeholders
 - Supported rollout and adoption activities
-

Results

- Reduced manual effort in product documentation
 - Improved speed of product planning activities
 - Enhanced accessibility of strategic product insights
 - Contributed to AI adoption within the Product Office
-

Skills Demonstrated

- AI Product Strategy
- Product Operations
- Change Management
- Digital Transformation
- Cross-functional Leadership
