

Product KPI Framework for Vodafone Business Product Office

Role: Product & Service Improvement Specialist

Company: Vodafone Group

Challenge

The Product Office lacked a unified framework for measuring product performance across the portfolio. Different teams used different metrics, making it difficult for leadership to assess product health and prioritize investments.

My Role

I led the design of a standardized product measurement framework covering:

- Product KPIs
 - OKRs
 - Operational metrics
 - Portfolio performance indicators
-

Actions Taken

- Analyzed existing product management practices
 - Interviewed stakeholders across Product, Finance, and Strategy
 - Defined KPI hierarchy from strategic goals down to operational metrics
 - Created reporting guidance and measurement standards
 - Established governance for KPI ownership and tracking
-

Results

- Enabled consistent product performance measurement across teams
 - Improved visibility for leadership decision-making
 - Supported portfolio prioritization and investment planning
 - Increased accountability within product teams
-

Skills Demonstrated

- Product Operations
- KPI Design
- Product Analytics
- Stakeholder Management
- Strategic Planning
